

End to end

One table's run, captured from the running app — the screens, the answers, the prompt they compose, and the picture that prompt produced. Table 4 · the garden city · 2026-09-21

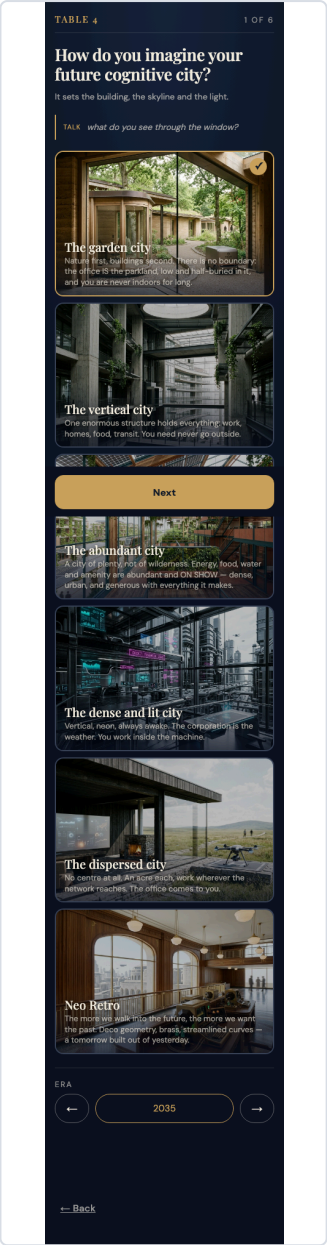

1 · The screens, in order

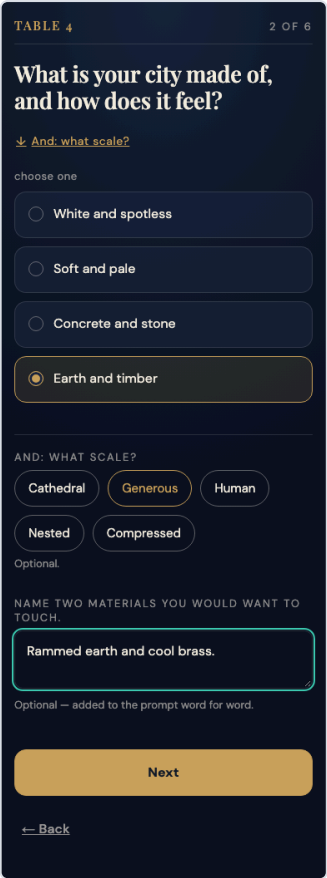

Landing
the city is named here, before anything is asked

Screen 1 — the lens
six future cities as pictures

Lens chosen
the era chip appears only once the pick lands server-side

Q1 — nature
a percentage slider, not tiles

TABLE 4

3 OF 6

How much of the outdoors is inside?

60% Courtyards

10% indoors100% outdoors

HOW DOES YOUR GREENERY COOL A MIND, NOT JUST A BODY?

Rain trees over the courtyards, so the shade moves with the day.

Optional — added to the prompt word for word.

Next

[← Back](#)

Q2 — deep work
six tiles, an And: chip row, an open-text box

TABLE 4

4 OF 6

Where does deep work happen in a centaur organisation?

The building already thinks. What does your table keep for itself?

[↘ And: where does the AI sit?](#)

choose one

☒ The dome in the rainforest

☐ The zen garden café

☐ The immersion chamber

☐ The sealed mud hut

☐ Somewhere from our imagination

AND: WHERE DOES THE AI SIT?

Unseen

In the light

On the surfaces

In the room

Optional.

WHAT DID YOUR TABLE REFUSE TO AUTOMATE?

Deciding who gets promoted.

Optional — kept with your answers for the wall, not drawn.

Next

[← Back](#)

Q3 — recharge

TABLE 4

5 OF 6

Where do people recharge?

Off a screen, into a different posture.

[↘ And: how far does it go?](#)

choose one

☐ The igloo

☐ The earth room

☐ The tea room

☒ The water room

☐ The sand room

☐ Outdoors

AND: HOW FAR DOES IT GO?

A view of it

A room that evokes it

Fully immersive

The real thing

Optional.

WHAT RECHARGE IS YOUR TABLE SHORT OF?

Twenty minutes where nobody can find us.

Optional — added to the prompt word for word.

Next

[← Back](#)

Q4 — materials

TABLE 4

6 OF 6

Any other flights of fancy?

It goes into the drawing word for word.

A staircase that is also a place to sit and watch the room.

THE PROMPT FOR OUR WORKSPACE
tap to read
Design a workplace that is relevant in 2035 for a team that chose the garden city; through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane, the AI present only as light. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere, the biome filling the frame. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured. Rammed earth and cool brass; wide lens, high ceilings, open floor. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

TABLE 4
Your workspace. 
Your workspace
You design a workplace with earthy tones and natural materials, featuring terracotta, clay, olive, and bronze, alongside rammed earth, rattan, aged brass, and linen. The space has wide lenses, high ceilings, and open floors.
WHAT WE ASKED FOR
Design a workplace that is relevant in 2035 for a team that chose the garden city; through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane, the AI present only as light. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere, the biome filling the frame. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured. Rammed earth and cool brass; wide lens, high ceilings, open floor. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

Done

the render, and the table's answers written back as a paragraph

2 · What this table answered

Q1 What is your city made of, and how does it feel? -> Earth and timber (And: Generous)
typed: Rammed earth and cool brass.

Q2 How much of the outdoors is inside? -> Courtyards
typed: Rain trees over the courtyards, so the shade moves with the day.

Q3 Where does deep work happen in a centaur organisation? -> The dome in the rainforest (And: In the light)
typed: Deciding who gets promoted.

Q4 Where do people recharge? -> The water room (And: Fully immersive)
typed: Twenty minutes where nobody can find us.

wildcard: A staircase that is also a place to sit and watch the room.

3 · The prompt those answers composed

1890 characters. Read out of the review screen's own textarea — this is the string submitted, not a reconstruction. The house half (camera, lighting, the no-text guard, the Avoid list) is also sent separately in fal's `system_prompt` field; it still appears here because the composed prompt has not stopped saying it.

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane, the AI present only as light. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere, the biome filling the frame. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured, Rammed earth and cool brass.; wide lens, high ceilings, open floor. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

4 · The workspace

fal-ai/nano-banana-2, 16:9, one hero render (ZONE_SET=hero). The bytes the phone was served, off the app's own R2 read path.

Does the picture contain the answers?

WHAT THE TABLE CHOSE	IN THE FRAME	
Earth and timber, generous scale	Rammed earth walls and timber throughout; open floor, high roof	yes
Courtyards — the floor opens to the sky	Green roofs and planted courtyards cut through the plate	yes
The dome in the rainforest	Glass dome among the trees, one person working inside it	yes
The water room, fully immersive	Steaming sunken pool, two people in it	yes
Wildcard — "a staircase that is also a place to sit and watch the room"	A broad stair holds the centre. Read as seating in one render and as plain circulation in another, off the same prompt	part
And: the AI sits "in the light"	Not legible as this pick. An “And:” chip is one short clause deep in a 1,890-character prompt	no
House rule — no laptops, no 2020s furniture	Held. The previous render of these same answers had laptops and task chairs; the work surfaces now light up under their hands	yes

A read of two renders of the same answers, not a measurement across the room. The laptop line IS a before/after with one variable changed; the staircase line is the reason the rest are not — two renders of one prompt differ, and a single frame is evidence of what the pipeline CAN do, not of what it will do twenty times. The wildcard appearing at all is the 21 Sep fix: under the default zone set the wildcard reached the database, the review screen, the desk and the export, and never the picture.
