TABLE 42 OF 6

What is your city made of, and how does it feel?

White and sleek

Soft pastels

Concrete and stone

Earth and timber

WHICH TWO MATERIALS WOULD YOU WANT TO TOUCH? OPTIONAL

Rammed earth and cool brass.

Next

Back

Landing

the title and a button, nothing else

Screen 1 — the lens

four cities, two across, one screenful

Lens chosen

Next appears only once the pick lands server-side

Q1 — materials

four options in plain words, and a box to write in

TABLE 4

3 OF 6

How much of the outdoors is inside?

☐ None

☒ 20%

☐ 40%

WHY THAT MUCH?

OPTIONAL

Rain trees over the courtyards, so the shade moves with the day.

Next

← Back

Q2 — outdoors
none, 20% or 40% — the slider is gone

TABLE 4

4 OF 6

Where does deep work happen in a centaur organisation?

☒ The dome in the rainforest

☐ The zen garden café

☐ The immersion chamber

☐ The sealed mud hut

☐ Somewhere from our imagination

WHAT DID YOUR TABLE REFUSE TO AUTOMATE?

OPTIONAL

Deciding who gets promoted.

Next

← Back

Q3 — deep work
four named spaces, and a fifth the table writes itself

TABLE 4

5 OF 6

Where do people recharge?

☐ The igloo

☒ The water room

☐ The tea room

☐ Outdoors, on the grass

WHAT RECHARGE IS YOUR TABLE SHORT OF?

OPTIONAL

Twenty minutes where nobody can find us.

Next

← Back

Q4 — recharge

TABLE 4

6 OF 6

Any other flights of fancy?

A staircase that is also a place to sit and watch the room.

THE PROMPT FOR OUR WORKSPACE tap to read

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane. They recharge in a warm enclosed bathing room, steam drifting under a high skylight, two people floating in water up to the chest, no devices anywhere. deliberate pockets of greenery. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured, Rammed earth and cool brass. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

Draw our workspace

polls every 2s; the phone can be put down

TABLE 4

Your workspace of the future.

You've chosen a workplace surrounded by nature, with a glass geodesic room set among trees, and a warm bathing room with steam rising under a skylight, where two people relax in water without any devices.

CHANGE ONE THING OPTIONAL

More light. Fewer people. Make the stair the centre.

Draw again

We're done

the render, and the table's answers written back as a paragraph

2 · What this table answered

Q1 What is your city made of, and how does it feel? -> Earth and timber
typed: Rammed earth and cool brass.

Q2 How much of the outdoors is inside? -> 20%
typed: Rain trees over the courtyards, so the shade moves with the day.

Q3 Where does deep work happen in a centaur organisation? -> The dome in the rainforest
typed: Deciding who gets promoted.

Q4 Where do people recharge? -> The water room
typed: Twenty minutes where nobody can find us.

wildcard: A staircase that is also a place to sit and watch the room.

3 · The prompt those answers composed

1763 characters. Read out of the review screen's own textarea — this is the string submitted, not a reconstruction. The house half (camera, lighting, the no-text guard, the Avoid list) is also sent separately in fal's `system_prompt` field; it still appears here because the composed prompt has not stopped saying it.

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane. They recharge in a warm enclosed bathing room, steam drifting under a high skylight, two people floating in water up to the chest, no devices anywhere. deliberate pockets of greenery. All of this in one single photograph of one continuous space, seen from one camera at one moment – never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured, Rammed earth and cool brass. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

4 · The workspace

fal-ai/nano-banana-2, 16:9, one hero render (ZONE_SET=hero). The bytes the phone was served, off the app's own R2 read path.

Does the picture contain the answers?

WHAT THE TABLE CHOSE	IN THE FRAME	
Earth and timber	Rammed earth walls, timber decks, aged brass throughout	yes
20% of the outdoors inside	Deliberate pockets — ferns and planting banked against the paths, not a wall of green	yes
The dome in the rainforest	A glass geodesic dome among mature trees, one person working inside it	yes
The water room	A steaming pool under a round skylight, two people floating in it	yes
Wildcard — “a staircase that is also a place to sit and watch the room”	A broad timber stair falls from the water room to the path, one person sitting on it looking out	yes
House rule — no laptops, no 2020s furniture	Not held in this render. A laptop is open on the dome table. The furniture half held; the laptop half did not	no

A read of ONE render, and the honest one rather than the flattering one. Four answers and the wildcard all landed — the wildcard visibly, which is the 21 Sep fix: under the default zone set it used to reach the database, the review screen, the desk and the export and never the picture. The house rule did not land. A render of these same answers yesterday had no laptop; this one does, off the same prompt and the same system_prompt. That is the lesson in one row — a negative biases, it does not forbid — and it is why the other five rows are a single frame’s evidence of what the pipeline CAN do, not a measurement of what it will do twenty times. The rule is worth keeping: it removed the 2020s task chairs and it removes the laptop from most frames. Nobody should promise the room that no laptop will appear.
