

End to end

One table's run, captured from the running app — the screens, the answers, the prompt they compose, and the picture that prompt produced. Table 4 · the garden city · 2026-09-21

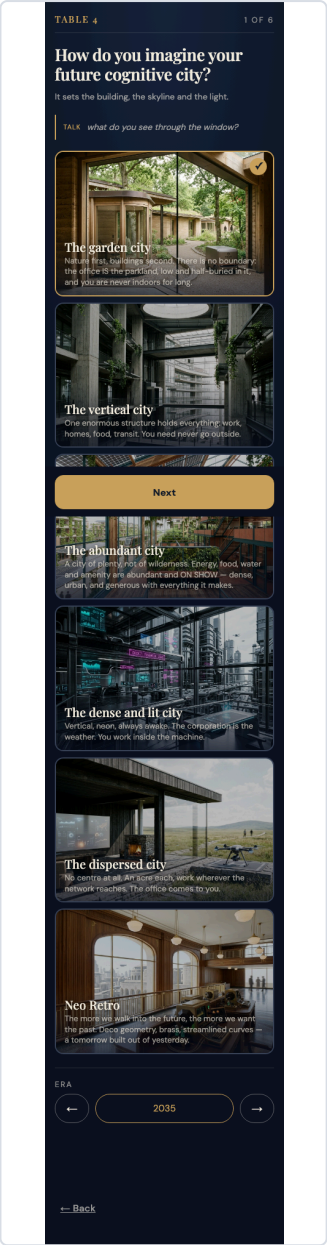

1 · The screens, in order

Landing
the city is named here, before anything is asked

Screen 1 — the lens
six future cities as pictures

Lens chosen
the era chip appears only once the pick lands server-side

Q1 — nature
a percentage slider, not tiles

TABLE 4

3 OF 6

Where does deep work happen?

The building already thinks. What does your table keep for itself?

And: where does the AI sit?

choose one

The glass dome in the forest

The garden café

Open garden seating

The immersive chamber

The reconfigurable pod

The sealed cell

AND: WHERE DOES THE AI SIT?

Unseen

In the light

On the surfaces

In the room

Optional.

WHAT DID YOUR TABLE REFUSE TO AUTOMATE?

Deciding who gets promoted.

Optional — kept with your answers for the wall, not drawn.

Next

Back

Q2 — deep work

six tiles, an And: chip row, an open-text box

TABLE 4

4 OF 6

Where do people recharge?

Off a screen, into a different posture.

And: how far does it go?

choose one

The igloo

The earth room

The tea room

The water room

The sand room

Outdoors

AND: HOW FAR DOES IT GO?

A view of it

A room that evokes it

Fully immersive

The real thing

Optional.

WHAT RECHARGE IS YOUR TABLE SHORT OF?

Twenty minutes where nobody can find us.

Optional — added to the prompt word for word.

Next

Back

Q3 — recharge

TABLE 4

5 OF 6

What is your material world?

And: what scale?

choose one

Stark and clinical

Soft and pastel

Raw and elemental

Warm and earthy

Jewel and lacquer

Undersea

AND: WHAT SCALE?

Cathedral

Generous

Human

Nested

Compressed

Optional.

NAME TWO MATERIALS YOU WOULD WANT TO TOUCH.

Rammed earth and cool brass.

Optional — added to the prompt word for word.

Next

Back

Q4 — materials

TABLE 4

6 OF 6

What have we missed?

It goes into the drawing word for word.

A staircase that is also a place to sit and watch the room.

THE PROMPT FOR OUR WORKSPACE tap to read

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. Inside, a glazed pod, an autonomous cart on the path, the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane, the AI present only as light. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere, the biome filling the frame. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured. Rammed earth and cool brass; wide lens, high ceilings, open floor. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

TABLE 4

Your workspace.

Your workspace

You choose a workplace with earthy tones of terracotta, clay, and olive, combined with natural materials like rammed earth, rattan, and aged brass. High ceilings and open floors dominate the space, with a glass geodesic room amidst the trees and a warm bathing area surrounded by lush greenery.

WHAT WE ASKED FOR

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. Inside, a glazed pod, an autonomous cart on the path, the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane, the AI present only as light. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere, the biome filling the frame. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured. Rammed earth and cool brass; wide lens, high ceilings, open floor. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

Done

the render, and the table's answers written back as a paragraph

2 · What this table answered

Q1 Your workplace in a cognitive city -> Courtyards
typed: Rain trees over the courtyards, so the shade moves with the day.

Q2 Where does deep work happen? -> The glass dome in the forest (And: In the light)
typed: Deciding who gets promoted.

Q3 Where do people recharge? -> The water room (And: Fully immersive)
typed: Twenty minutes where nobody can find us.

Q4 What is your material world? -> Warm and earthy (And: Generous)
typed: Rammed earth and cool brass.

wildcard: A staircase that is also a place to sit and watch the room.

3 · The prompt those answers composed

1890 characters. Read out of the review screen's own textarea — this is the string submitted, not a reconstruction. The house half (camera, lighting, the no-text guard, the Avoid list) is also sent separately in fal's `system_prompt` field; it still appears here because the composed prompt has not stopped saying it.

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane, the AI present only as light. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere, the biome filling the frame. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured, Rammed earth and cool brass.; wide lens, high ceilings, open floor. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

4 • The workspace

fal-ai/nano-banana-2, 16:9, one hero render (ZONE_SET=hero). The bytes the phone was served, off the app's own R2 read path.

Does the picture contain the answers?

WHAT THE TABLE CHOSE	IN THE FRAME	
Courtyards — the floor opens to the sky	Glazed roof structure, courtyards cut through the plate	yes
The glass dome in the forest	Geodesic dome, one person working inside it	yes
The water room, fully immersive	Steaming pool, two people floating	yes
Warm and earthy, generous scale	Rammed earth, timber, brass, terracotta paving; open floor	yes
Wildcard — "a staircase that is also a place to sit and watch the room"	Stepped seating at right, two people sitting on it	yes
And: the AI sits "in the light"	Not legible. The autonomous cart reads as the garden city's own signature, not as this pick	no

A read of this one render, not a measurement across the room. The wildcard appearing at all is the 21 Sep fix: under the default zone set the wildcard reached the database, the review screen, the desk and the export, and never the picture.
