

End to end

One table's run, captured from the running app — the screens, the answers, the prompt they compose, and the picture that prompt produced. Table 4 · the garden city · 2026-09-22

1 · The screens, in order

TABLE 4

The Survival Adventure

Start here

TABLE 41 OF 6

How do you imagine your future cognitive city?

The garden city

The vertical city

The abundant city

The dense and lit city

The dispersed city

TABLE 42 OF 6

What is your city made of, and how does it feel?

White and spotless

Soft and pale

Concrete and stone

Earth and timber

NAME TWO MATERIALS YOU WOULD WANT TO TOUCH.

Rammed earth and cool brass.

Next

Back

Landing

the title and a button, nothing else

Screen 1 — the lens

six cities, two across, one screenful

Lens chosen

Next appears only once the pick lands server-side

Q1 — materials

four options in plain words, and a box to write in

TABLE 4

3 OF 6

How much of the outdoors is inside?

60% Courtyards

10% indoors

100% outdoors

HOW DOES YOUR GREENERY COOL A MIND, NOT JUST A BODY?

Rain trees over the courtyards, so the shade moves with the day.

Next

← Back

Q2 — outdoors
a percentage slider, not a list

TABLE 4

4 OF 6

Where does deep work happen in a centaur organisation?

The dome in the rainforest

The zen garden café

The immersion chamber

The sealed mud hut

Somewhere from our imagination

WHAT DID YOUR TABLE REFUSE TO AUTOMATE?

Deciding who gets promoted.

Next

← Back

Q3 — deep work
four named spaces, and a fifth the table writes itself

TABLE 4

5 OF 6

Where do people recharge?

The igloo

The earth room

The tea room

The water room

The sand room

Outdoors

WHAT RECHARGE IS YOUR TABLE SHORT OF?

Twenty minutes where nobody can find us.

Next

← Back

Q4 — recharge

TABLE 4

6 OF 6

Any other flights of fancy?

A staircase that is also a place to sit and watch the room.

59 / 140

THE PROMPT FOR OUR WORKSPACE tap to read
Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured, Rammed earth and cool brass. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

Being drawn. A couple of minutes. Put the phone down.
Workspace DRAWING

Drawing
polls every 2s; the phone can be put down

TABLE 4
Your workspace.  Your workspace You work in a space surrounded by natural materials like terracotta, clay, and rattan, with a glass geodesic room nestled among trees, and you have a warm bathing area with steam and water, and your workspace is broken up by planted courtyards that open to the sky. Draw again We're done ← Back

Done
the render, and the table's answers written back as a paragraph

2 · What this table answered

Q1 What is your city made of, and how does it feel? -> Earth and timber
typed: Rammed earth and cool brass.

Q2 How much of the outdoors is inside? -> Courtyards
typed: Rain trees over the courtyards, so the shade moves with the day.

Q3 Where does deep work happen in a centaur organisation? -> The dome in the rainforest
typed: Deciding who gets promoted.

Q4 Where do people recharge? -> The water room
typed: Twenty minutes where nobody can find us.

wildcard: A staircase that is also a place to sit and watch the room.

3 · The prompt those answers composed

1792 characters. Read out of the review screen's own textarea — this is the string submitted, not a reconstruction. The house half (camera, lighting, the no-text guard, the Avoid list) is also sent separately in fal's `system_prompt` field; it still appears here because the composed prompt has not stopped saying it.

Design a workplace that is relevant in 2035 for a team that chose the garden city: through the glass, low pavilions under trees, gravel paths; weathered oak, bronze. Show the whole workspace in one elevated three-quarter view from a gallery balcony on the far side, one continuous building, as a film still: anamorphic, volumetric daylight, haze, bright overall exposure, daylight filling the volume, open shadows, no logos, no text. low rammed-earth pavilions with green roofs under mature trees, gravel paths, deep eaves. inside, a glazed pod, an autonomous cart on the path. the ceiling is a meadow seen from below, grass against the glass. Deep work happens as a glass geodesic room standing alone among mature trees, one person working inside, forest pressing against every pane. They recharge in a warm shallow bathing room in daylight, steam drifting, two people floating in water up to the chest, no devices anywhere. planted courtyards cut open to the sky, the floor plate broken by them. All of this in one single photograph of one continuous space, seen from one camera at one moment — never panels, insets or a divided frame. terracotta, clay, olive and bronze; rammed earth, rattan, aged brass, linen; woven and textured, Rammed earth and cool brass. high midday sun falling through the canopy, dappled and open, nothing held in deep shade. People small and anonymous, mid-task, two to six of them. A staircase that is also a place to sit and watch the room. Avoid: collage, grid, split screen, labels, personas, stark white, posed faces, paper notebooks, coffee mugs, 2020s office furniture, laptops, neon, high-rise, crowds, no signage text, no wayfinding words, no captions, underexposed, murky, crushed blacks, gloom, panels, insets, a contact sheet, a divided frame. no text

4 • The workspace

fal-ai/nano-banana-2, 16:9, one hero render (ZONE_SET=hero). The bytes the phone was served, off the app's own R2 read path.

Does the picture contain the answers?

WHAT THE TABLE CHOSE	IN THE FRAME	
Earth and timber	Rammed earth walls and timber throughout	yes
Courtyards — the floor opens to the sky	Green roofs and planted courtyards cut through the plate	yes
The dome in the rainforest	Glass dome among the trees, one person working inside it	yes
The water room, fully immersive	Steaming sunken pool, two people in it	yes
Wildcard — "a staircase that is also a place to sit and watch the room"	A broad stair holds the centre. Read as seating in one render and as plain circulation in another, off the same prompt	part
And: the AI sits "in the light"	Not legible as this pick. An "And:" chip is one short clause deep in a 1,890-character prompt	no
House rule — no laptops, no 2020s furniture	Held. The previous render of these same answers had laptops and task chairs; the work surfaces now light up under their hands	yes

A read of two renders of the same answers, not a measurement across the room. The laptop line IS a before/after with one variable changed; the staircase line is the reason the rest are not — two renders of one prompt differ, and a single frame is evidence of what the pipeline CAN do, not of what it will do twenty times. The wildcard appearing at all is the 21 Sep fix: under the default zone set the wildcard reached the database, the review screen, the desk and the export, and never the picture.
