

The question book

Every question a table is asked, every option it can choose, and the picture it sees — in the order they are asked.

4 questions, plus the lens and the wildcard — 6 screens on the phone ·
20 tables · generated 2026-09-21

Generated from questions.ts, futures.ts and the pictures on disk by scripts/gen-question-book.mjs. Re-run it after any change to either.

First: choose your lens

A worldview, not a character. It sets what surrounds the table: the building, the skyline, the light. One per table; a table may also skip it.

The garden city

Nature first, buildings second. There is no boundary: the office IS the parkland, low and half-buried in it, and you are never indoors for long.

Ebenezer Howard, To-morrow, 1898 · era default: recognisably-2035

The vertical city

One enormous structure holds everything: work, homes, food, transit. You need never go outside.

Paolo Soleri, Arcology: The City in the Image of Man, 1969 · era default: hyperfuturistic-2040

The abundant city

A city of plenty, not of wilderness. Energy, food, water and amenity are abundant and ON SHOW — dense, urban, and generous with everything it makes.

"From Steampunk to Solarpunk", 2008 — a design movement, not a film · era default: recognisably-2035

The dense and lit city

Vertical, neon, always awake. The corporation is the weather. You work inside the machine.

Gibson, Neuromancer, 1984; Neo Seoul 2144 in Cloud Atlas, 2012 · era default: hyperfuturistic-2040

The dispersed city

No centre at all. An acre each, work wherever the network reaches. The office comes to you.

Frank Lloyd Wright, The Disappearing City, 1932 · era default: recognisably-2035

Neo Retro

The more we walk into the future, the more we want the past. Deco geometry, brass, streamlined curves — a tomorrow built out of yesterday.

Deco and Streamline Moderne, c. 1925-1939 · era default: retro-1930s (locked)

1 OF 4

How much of the outdoors is inside?

Slide from a controlled indoor office with a little greenery to a workspace standing in the forest.

TALK Singapore is hot and humid. How does your greenery cool a mind as well as a body?

q8 · pick one · feeds the **materials**And**Light** layer

Sparse inside, abundant outside — the greenery is beyond the glass

sparse-inside-abundant-outside

Pockets — deliberate, placed moments of planting

deliberate-pockets

Saturated — greenery threaded through the entire floor

saturated

Landscape indoors — trees, water, rock and soil you can walk into

landscape-indoors

Nature as structure — terraces and open-air floors; the building is the garden

nature-as-structure

◆ Where does deep work happen in a centaur organisation?

AI brings speed, pattern and scale. People bring judgement, ethics, creativity and context. This is the one place your table works — the workstation question is folded into it.

TALK what did your table refuse to automate?

q5c · pick one · feeds the **programme** layer · the talk reply is kept for the wall, not drawn

The glass dome in the forest — one transparent room standing in the trees, alone with the work

glass-dome

The garden café — many settings in one planted room: benches, booths, counters, chosen by mood

garden-café

Open garden seating — no walls at all; work happens outdoors under planting and sky

open-garden

The immersive chamber — a room that becomes somewhere else; deep sea, canopy, orbit

immersive-chamber

The reconfigurable pod — one room that changes its size, acoustics and light to suit the task

reconfigurable-pod

The sealed cell — four walls, a door you close, no AI in the room at all

sealed-cell

And: where does the AI sit?

Optional — never blocks the way forward.

Unseen

In the light

On the surfaces

In the room

3 OF 4

◆ Where do people recharge?

AI-supported work adds cognitive load, not less. These rooms exist to get people off a screen and into a different posture.

TALK which of the four is your organisation actually short of?

q6r · pick one · feeds the **programme** layer

The igloo — a low white dome you crawl into; curved, quiet, no corners and no screen

igloo

The earth room — thick cool mud walls, a low doorway, deep shade and a beaten floor you sit on

mud-hut

The tea room — tatami, paper light, a kettle; you kneel, and the room asks you to slow down

tea-room

Outdoors — no room at all; grass, wind and open horizon, the work left behind indoors

outdoors

And: how far does it go?

Optional — never blocks the way forward.

A view of it

A room that evokes it

Fully immersive

The real thing

4 OF 4

◆ What is your material world?

TALK name two materials you would actually want to touch.

q2 · pick one · feeds the **materialsAndLight** layer

Deep and low-lit — near-black and charcoal; smoked glass, blackened metal, dark timber; sleek and shadowed

deep-low-lit

Stark and clinical — pure white, shadowless; seamless resin, glass, polished steel; shiny and flawless

stark-clinical

Soft and pastel — blush, sage, butter; felt, bouclé, painted timber, matte ceramic; soft and tactile

soft-pastel

Raw and elemental — grey, sand, ochre; board-marked concrete, stone, rough timber; rugged and unpolished

raw-elemental

Warm and earthy — terracotta, clay, olive, bronze; rammed earth, rattan, aged brass, linen; woven and textured

warm-earthy

Jewel and lacquer — emerald, oxblood on black; lacquered wood, velvet, marble, brass; glossy and deep

jewel-lacquer

Undersea — teal and deep blue-green, light rippling from above; curved glass, wet-look surfaces; fluid and slick

undersea

And: what scale?

Optional — never blocks the way forward.

Cathedral

Generous

Human

Nested

Compressed
